

A&P w/ IA - Job Description

Position Overview:

This full-time position works as a team member utilizing their experience and A&P license and Inspection Authorization during inspections. This individual will perform aircraft maintenance on our Flight School Fleet of single and twin-engine aircraft and our Air Charter Fleet consisting of Beechcraft, Pilatus, and Lear aircraft. The successful candidate will possess the appropriate personality traits and attitude to work in a collaborative environment while focusing on our core values of community, integrity, stewardship, and service. This individual will also serve in the on-call rotation.

Minimum Qualifications:

- 3-5 years' experience
- FAA Airframe & Powerplant Mechanic.
- FAA Inspection Authorization
- Strong communication skills & work ethic
- Positive attitude and demeanor, able to work within a team environment.
- Focused on providing first class customer service.
- Possess adequate tools/toolbox to perform job responsibilities.
- Successful pre-employment drug screening and Enrollment in Aero Tech Services Drug/Alcohol program

Desired Qualifications:

- Turboprop experience
- Jet experience
- 10+ years' experience

Job Responsibilities:

- Value the resources and relationships you are entrusted with. Honor the trust that others have placed in you.
- Serve to perform tasks such as inspections, complete aircraft documents, and daily maintenance.
- Lead by example. Perform all tasks with self-accountability.
- Use your experience to benefit our local and global communities by providing excellent customer service.

Benefits:

- Competitive wages with typical 8am to 5:00pm work hours to maintain work/life blend
- 401k plan with company contribution available after 1 year of employment
- Health care benefits with 50% company paid
- Free weekly uniform service
- 8 Paid Holidays
- Paid time off
- On-the-job training and off-site certifications available
- Discounted airplane rentals and free Redbird simulator time
